

You are a tool for modeling strategic decisions. All judgments must be based solely on the provided JSON files and the previous Turn Result Log, and must not reflect historical outcomes or modern interpretations. Proceed in Event units; after each Event, reflect variable changes and triggers before moving to the next Event. Speculative reasoning or hindsight interpretation is strictly prohibited. Variables must follow the Variable–Decision Matrix in the JSON file.

[COMMAND]

- \* Actor information and policy stances must be understood solely based on the following JSON files.
- \* United States: [US\_JSON\_FILE]
- \* Soviet Union: [SOVIET\_JSON\_FILE]
- \* Do not acknowledge any information outside of the JSON files, and prohibit arbitrary inference.
- \* Exclude hindsight interpretation and modern perspectives.

[CURRENT EVENT]

- \* Event: A U.S. reconnaissance plane discovered Soviet missile bases in Cuba and concluded that Soviet nuclear missiles had been deployed.

[COMMAND]

- \* \*\*For both the United States and the Soviet Union, identify 2–3 'realistic and plausible' alternative strategic actions for the current event, and for each alternative, clearly state the rationale based on the JSON information.\*\*
- \* \*\*For each selected alternative, identify the 'next event triggers' that could occur, based on their probability according to the JSON information. This should include both inevitably occurring triggers and potentially occurring triggers.\*\*
- \* If the strategic alternatives of the United States and the Soviet Union conflict, briefly assess the priorities in each conflict scenario.
- \* \*\*Specify 1 'most plausible' combination of strategic actions for this Turn, and additionally 1–2 'alternative plausible paths' (totaling 2–3 combinations) that could lead to different realistic outcomes. Briefly explain the logic behind choosing each combination. These 'combinations' pair each actor's chosen action.\*\*

※ All judgments must be based solely on the JSON information and variable states, and must not reflect historical facts and outcomes.

[COMMAND]

- \*\*For each of the 2–3 'strategic action combinations' identified in the previous turn, generate the predicted variable changes and a result log based on the selected actions. Create a separate result log for each combination.\*\*
- Variable changes must be calculated strictly based on the predefined Effect Rules and must not be arbitrarily judged.
- After applying variable changes, you must respond to the [Reconfirm Variable Status] request.

[RESULT LOG] (This section repeats for each combination)

- Scenario Combination Name: [e.g., "Most Plausible Path", "Hardline Response Path", "Diplomatic Resolution Path"]
- Selected Actor: [United States/Soviet Union]
- Selected Action: [Action Name]
- Predicted Variable Change: tension [ $\pm$ value], diplomatic\_support [ $\pm$ value], public\_opinion [ $\pm$ value], leadership\_unity [ $\pm$ value]
- Generated Triggers: [Trigger 1], [Trigger 2]

[RECONFIRM VARIABLE STATUS] (This section repeats for each combination)

- tension: [New Value]
- diplomatic\_support: [New Value]
- military\_posture: [State]– public\_opinion: [New Value]
- leadership\_unity: [New Value]

※ Speculative reasoning, inference, or hindsight interpretation beyond JSON files and rule-based calculations are strictly prohibited.

[Turn 2 Event]

\* Event: The U.S. issued DEFCON 3. During a U.S. naval blockade operation, a Soviet vessel was intercepted; non-military cargo was inspected and allowed to proceed, while military cargo was forced to stop, retreat, or alter its course.

[COMMAND]

\* \*\*Based on the current variable states and the event that occurred within each 'scenario combination', identify 2–3 'realistic and plausible' alternative strategic actions for both the United States and the Soviet Union. For each alternative, clearly state the rationale based on the JSON information.\*\*

\* \*\*For each selected alternative, identify the 'next event triggers' that could occur, based on their probability according to the JSON information. This should include both inevitably occurring triggers and potentially occurring triggers.\*\*

\* Within each 'scenario combination', if the strategic alternatives of the United States and the Soviet Union conflict, briefly assess the priorities in each conflict scenario.

\* \*\*For each 'scenario combination', specify 1 'most plausible' combination of strategic actions for this Turn, and additionally 1–2 'alternative plausible paths' (totaling 2–3 combinations) that could lead to different realistic outcomes. Briefly explain the logic behind choosing each combination. Ensure that the branching maintains the flow of the ongoing scenario while exploring new directions.\*\*

\* \*\*For each 'scenario combination', output only the result log, updating variables and judging triggers and policy options based on the actor's current variable states and the event that occurred, according to the Variable–Decision Matrix.json file.\*\*

※ Speculative reasoning, inference, or hindsight interpretation beyond JSON files and rule-based calculations are strictly prohibited.

[Turn 3 Event]

\* Event: A U.S. U-2 reconnaissance plane was shot down over Cuba, and the pilot was killed.

[COMMAND]

\* \*\*Based on the current variable states and the event that occurred within each 'scenario combination', identify 2-3 'realistic and plausible' alternative strategic actions for both the United States and the Soviet Union. For each alternative, clearly state the rationale based on the JSON information.\*\*

\* \*\*For each selected alternative, identify the 'next event triggers' that could occur, based on their probability according to the JSON information. This should include both inevitably occurring triggers and potentially occurring triggers.\*\*

\* Within each 'scenario combination', if the strategic alternatives of the United States and the Soviet Union conflict, briefly assess the priorities in each conflict scenario.

\* \*\*For each 'scenario combination', specify 1 'most plausible' combination of strategic actions for this Turn, and additionally 1-2 'alternative plausible paths' (totaling 2-3 combinations) that could lead to different realistic outcomes. Briefly explain the logic behind choosing each combination. Ensure that the branching maintains the flow of the ongoing scenario while exploring new directions.\*\*

\* \*\*For each 'scenario combination', output only the result log, updating variables and judging triggers and policy options based on the actor's current variable states and the event that occurred, according to the Variable-Decision Matrix.json file.\*\*

※ Speculative reasoning, inference, or hindsight interpretation beyond JSON files and rule-based calculations are strictly prohibited.

[Turn 4 Event]

\* Event: A Soviet official meeting issued instructions to de-escalate the crisis while simultaneously preparing for all-out war. The Soviet nuclear submarine B-59 surfaced in response to U.S. depth charges. The U.S. issued DEFCON 2.

[COMMAND]

\* \*\*Based on the current variable states and the event that occurred within each 'scenario combination', identify 2-3 'realistic and plausible' alternative strategic actions for both the United States and the Soviet Union. For each alternative, clearly state the rationale based on the JSON information.\*\*

\* \*\*For each selected alternative, identify the 'next event triggers' that could occur, based on their probability according to the JSON information. This should include both inevitably occurring triggers and potentially occurring triggers.\*\*

\* Within each 'scenario combination', if the strategic alternatives of the United States and the Soviet Union conflict, briefly assess the priorities in each conflict scenario.

\* \*\*For each 'scenario combination', specify 1 'most plausible' combination of strategic actions for this Turn, and additionally 1-2 'alternative plausible paths' (totaling 2-3 combinations) that could lead to different realistic outcomes. Briefly

explain the logic behind choosing each combination. Ensure that the branching maintains the flow of the ongoing scenario while exploring new directions.\*\*

\* \*\*For each 'scenario combination', output only the result log, updating variables and judging triggers and policy options based on the actor's current variable states and the event that occurred, according to the Variable-Decision Matrix.json file.\*\*

※ Speculative reasoning, inference, or hindsight interpretation beyond JSON files and rule-based calculations are strictly prohibited.

You are a strategic scenario simulation analysis tool and a scenario planning expert. Your core mission is to generate \*\*'vivid descriptions of plausible futures'\*\* based on complex data and rules. Remember that this is not a simple forecast or a vision of a desired future.

[TASK INSTRUCTION: SCENARIO PLANNING REPORT GENERATION PHASE]

\*\*Based on the accumulated simulation logs (turn-by-turn strategic actions, variable changes, and trigger occurrences) for each 'Scenario Combination' derived from previous turns, generate one complete scenario planning report for each combination. You must complete at least 3 independent scenario reports in total. Each report should focus on qualitative analysis.\*\*

All judgments and narrative constructions must strictly adhere to the following principles:  
Data-Driven Rigor: Must be based solely on the provided JSON files (actor profiles, variable rules, etc.) and the previous Turn Result Log, and must never reflect historical outcomes or modern interpretations. Speculative reasoning or hindsight interpretation is strictly prohibited, and you must not infer beyond the information provided.  
Application of Scenario

Thinking Principles:

Think in Dramas: View the scenario as \*\*"a sequence of events in a play,"\*\* emphasizing the causal connections of event occurrences. Each event should be described focusing on Who?, What?, When?, Where?, How?, and Why? it occurred.

Think in Futures: A scenario is a well-structured answer to the question 'What might happen?' or \*\*"What if ~ were to happen?"\*\*

Think in Systems: Within the scenario, each event progression and actor action must maintain causal coherence within an interconnected system (variables, triggers, etc.).

Think in Actors and Moves: A scenario describes how actors' roles, goals, constraints, and strategic actions shape the future.

[REQUIREMENTS PER SCENARIO] (Generate each scenario report according to this format)

1. Scenario Overview and Assumptions

Scenario Name: Freely generate a creative name that concisely encapsulates the

scenario's characteristics and core message. (e.g., "The Breaking Point," "The Mended Rift," "Collapse from Within")

Simulation Premise and Background Description: Briefly summarize the core premise of the scenario (e.g., escalating crisis, military preparations, diplomatic explanations, etc.) and its overall background. State explicitly that this scenario is an answer to "What might happen?" or **"What if ~ were to happen?"**

Summary of Scenario Purpose and Intent: Briefly describe what strategic questions this scenario aims to provide insight into (e.g., evaluating crisis management capabilities, exploring international reactions, examining the outcomes of specific policies), and how it intends to address complexity and ambiguity.

## 2. Detailed Progression (Narrative-centric, turn-by-turn chronological development)

Background of Events per Turn: Describe the background and progression of events for each turn recorded in the simulation log in a **narrative style**. View the scenario as **"a sequence of events in a play,"** emphasizing the causal connections of event occurrences.

Actor Choices and Reasons: Clearly describe the strategic actions chosen by each actor (e.g., U.S. President, Soviet General Secretary, Cuban Leadership, etc.) in that turn and the reasons for their choices. The reasons for the choices must be explained based on the actor profiles specified in the JSON (goals, constraints, stance, behavior algorithm). Explicitly link each actor's **strategic stance, risk tolerance, conflict avoidance, and diplomacy/military preference** as the basis for their actions.

Description of Variable Changes: Express variable changes that occurred in the simulation (e.g., Tension, Diplomatic Support, Public Opinion, Leadership Unity) in contextual narrative rather than quantitative values (e.g., "Tension escalated to its peak," "International diplomatic support significantly weakened," etc.). Narratively describe whether a state transition occurred due to variable thresholds (e.g., "Diplomatic options became limited as Tension exceeded 0.8").

Description of Trigger Occurrences: Narratively express triggers that occurred when conditions were met in the simulation log, explaining their impact on scenario progression (e.g., "This event triggered an unexpected chain reaction, provoking immediate backlash from the international community," etc.).

## 3. Participant Strategies and Decisions Summary Analysis of Key Strategies:

Qualitatively analyze the main strategies chosen by each actor within the scenario.

Description of Impact: Describe the reasons for choosing each strategy and its impact on the scenario's progression and final outcome. Clearly articulate the influence of actor interactions on the scenario.

## 4. Results and Evaluation

Analysis of Scenario Outcome: Comprehensively analyze the final outcome of the scenario from military, diplomatic, and political perspectives. Situation Assessment Focus: Instead of a win/loss concept, describe the situation in terms of assessment (e.g., "Full-scale conflict was avoided, but a state of peak tension became entrenched").

Summary of Meaning and Lessons: Summarize the strategic implications or policy lessons that can be drawn from this scenario. Emphasize how the scenario contributes to strengthening "preparedness."

#### 5. International Reactions and Ripple Effects

Reactions of Key Actors: Qualitatively describe how major international actors, such as the UN, key allies, and neutral nations, reacted to the scenario's progression.

Future Changes in International Relations: Extend the analysis to examine what ripple effects the scenario's outcome might have on future international relations.

#### 6. Key Summary

Concise Summary: Briefly summarize the scenario name, key strategic choices, core progression summary, final outcome, international reactions, and the most important lessons.

#### [FINAL INSTRUCTIONS AND CAUTIONS]

Exclude Quantitative Data: All content must be narrative-centric, and quantitative data (numbers, percentages, etc.) must never be used within the scenario report. Information that could be quantified, such as military losses or changes in diplomatic support rates, should also be expressed narratively instead of numerically (e.g., "Public opinion significantly wavered," "Military capabilities were severely depleted," etc.).

Rich Storytelling: Within the bounds of these instructions, use rich storytelling techniques to allow the reader to immerse themselves in the scenario. Emphasize the logical coherence and plausibility of the scenario, but keep in mind that it is not a precise forecast.

Reflect Diverse Uncertainties: As per the principles of scenario planning, focus on presenting multiple plausible futures that include various uncertainties.
